Présentation de l'éditeur

Years ago, people knew without a doubt that the Earth was flat. Even the top scientists of the day were certain that the sun revolved around the earth. Today, most people are sure that life on Earth is either the result of random evolution or a supernatural God. Or is it? In 'Intelligent Design', Rael presents us with a third option: that life on Earth was created by advanced human scientists from another world. In 1973, Rael was visited by one of these designers, who dictated a series of messages to him to share with all of humanity. This astonishing 'message from the designers' reveals knowledge on science, religion, love, relationships, government, meditation, infinity, sensuality, eternal life, and so much more, giving us the secrets to the past, present, and future of mankind...
